

## Introducing The New Packforum Experience!

Packforum, a 3,100m<sup>2</sup> centre dedicated to collaboration, education and innovation, is located in our Passirana plant in Italy. An unrivalled facility committed to demonstrating how Sealed Air can help customers solve their most demanding packaging and resource challenges.

Our extensive facilities provide a technology-driven, customer engagement experience and provide the support, tools and expertise required for every step of the development journey.

Packforum is the home to Sealed Air's food and protective packaging solutions, making this a permanent trade show that showcases our newest technology, systems and products in a setting that is ideal for demonstrations and meetings.

### Meet and Connect

The perfect environment for collaboration, engagement and customer interaction.

### Develop and Test

State-of-the-art facilities and industry experts enable collaboration with customers to develop, refine and test future solutions.

### Influence, Educate and Inspire

Training, seminars and events on industry trend topics as well as innovative product demonstrations.

Combined with Sealed Air's leading global expertise and packaging solutions, Packforum EMEA provides a technology driven customer engagement experience with a focus on innovation, sustainability, and resource efficiency for the packaging industries.

**Conference Area**

Packforum boasts a modern open congress hall with video streaming capabilities, that seats up to 150, making it perfect for conferences, seminars and training sessions. In addition, it also has 6 individual meeting rooms, seating from 8 to 22 delegates - perfect for customer meetings.

**Technical Hall**

The 1,200m<sup>2</sup> technical hall showcases a wide range of functioning Sealed Air food and protective packaging systems and solutions, perfect for customer demonstrations and meetings, as well as product training and showcasing.

**Development Facilities**

Packforum is located at one of our largest food packaging manufacturing facilities in EMEA, resulting in a complete end-to-end experience. Our global R&D centre is also located on-site while our Protective Packaging Application Centre is only a short journey away in Bellusco.
